

## Focused, forward thinking, and fast.

*Fusion is a new breed of carrier, working 24 hours a day to help companies achieve their strategic business objectives by delivering advanced IP-based voice and data solutions, high-speed Internet access, and other mission-critical communications services.*

**Fusion makes it happen. Fusion makes it easy. Fusion makes it right.**

## About Fusion

*Incorporated in 1997, Fusion has been delivering a full range of world-class communications solutions and exceptional customer support for over ten years.*

*Fusion's customer roster spans markets and continents, including small businesses and Fortune 100 corporations, consumers, and carriers from around the world. Leveraging its global carrier-class network and the expertise of its tech-savvy management team, Fusion combines the best of traditional communications technologies with the advantages of Voice over Internet Protocol (VoIP).*

*Our advanced service offerings provide solutions for every business: Hosted IP PBX service for companies looking to optimize their communications infrastructure, IP Connect and IP Call Termination for companies that want to keep their current phone systems yet realize the cost savings available from IP-based services, Broadband Internet Access, and a full range of enhanced services.*

*Most importantly, Fusion is committed to the success of your business. We not only provide outstanding communications solutions, we stand behind them. Our dedicated customer service and technical support specialists ensure that Fusion is always there, always on, and always ready.*

## How We Do It

Fusion's commitment is simple: to enable your business success by providing a full suite of communications solutions that exceed your expectations. Fusion makes it happen by:

- ◆ *Solving problems, delivering solutions, and anticipating your future business needs.*
- ◆ *Providing the network, infrastructure, and expertise to meet your company's communications requirements.*
- ◆ *Fusing IP and traditional technologies to create a seamless interface between old and new, offering maximum flexibility.*
- ◆ *Supporting your business applications with end-to-end managed solutions, and providing a single source for your voice, data, and Internet needs.*
