

Do you still have separate Internet connections and phone lines? Does your current phone system lack features and functionality?

If so, it's time for a change. By harnessing the power of today's IP technology, Fusion's Hosted IP PBX service offers forward thinking businesses a managed, IP-based voice and data solution with the robust features and functionality traditionally available only to the largest enterprises.

Fusion's Hosted IP PBX service bundles high-speed Internet access, local and long distance calling, voicemail, and a host of advanced calling features into a single, affordable package that lets you take control of your business communications. Select the Standard or Enhanced service package, and choose the calling plan that is right for you:

Easy Connect

A low monthly fee with usage-based local and long distance charges

Local Connect

Unlimited local area calling with usage-based long distance charges

Total Connect

Unlimited local and domestic long distance calling

Imagine the Possibilities...

Imagine managing your company's phone system moves, adds, and changes from an easy-to-use web interface. Imagine calling people just by clicking on their contact information in Microsoft Outlook®. Imagine your voicemails being automatically delivered to you while you travel.

All this, and more, is possible with Fusion's revolutionary Hosted IP PBX service.

Transforming the Way You Communicate

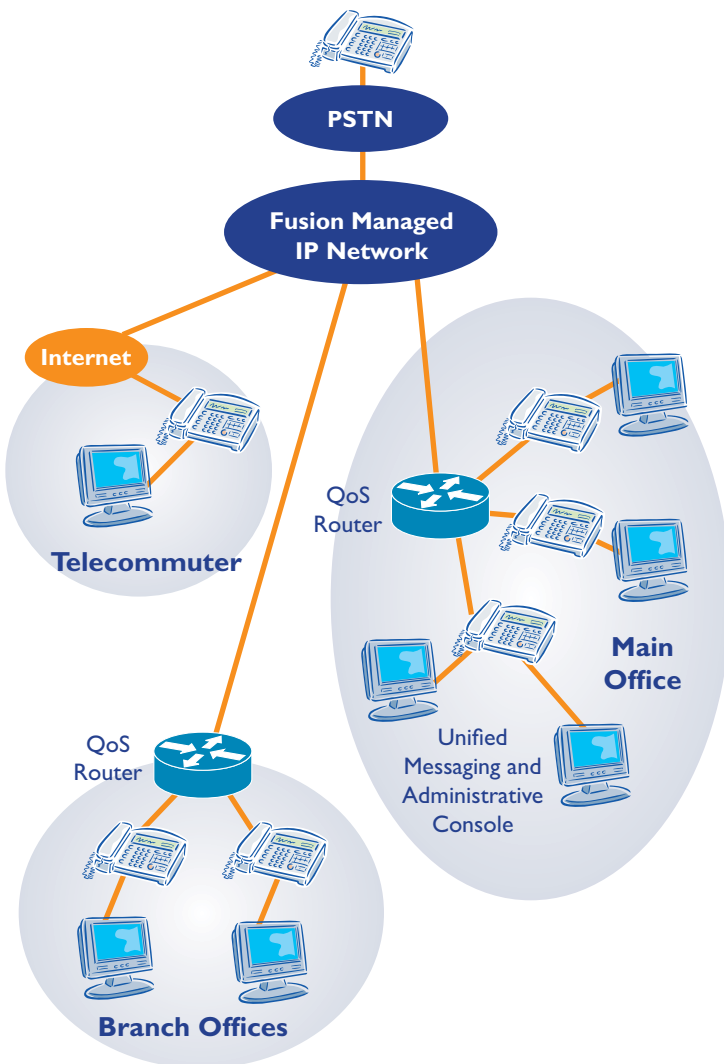

- ◆ **Minimal Upfront Investment**
 Fusion's Hosted IP PBX service lets your company enjoy the many benefits of IP telephony, without the heavy upfront capital costs or ongoing operational expenses.
- ◆ **Exceptional Quality**
 Fusion's managed IP network and Quality of Service (QoS) routers prioritize your voice traffic to guarantee superior voice services and reliable, secure Internet connectivity.
- ◆ **Increased Productivity**
 The enhanced features of Hosted IP PBX, including "voicemail to email" and "find me / follow me," increase employee productivity and reduce telephone tag.
- ◆ **Get More for Less**
 Enjoy added calling features, enhanced functionality, and simple administration, while realizing significant savings compared to traditional PBX or Key Telephone Systems.
- ◆ **Scalability and Flexibility**
 Our Hosted IP PBX solution empowers you with virtually unlimited growth of lines, extensions, and voicemail. We even provide the flexibility to control everything yourself through our intuitive web interface.

How Does It Work?

With Fusion's Hosted IP PBX service, your phone calls are routed over the Internet through Fusion's managed IP network directly to the person you call.

Getting started is as simple as 1, 2, 3...

- 1 Select a service package and calling plan to fit your needs.
- 2 A broadband Internet connection, QoS router, and IP phones will be installed at your location(s).
- 3 Begin enjoying your new communications capabilities in 30 days or less.
