

DATA SHEET **ConferenceManager** Emergency Conferencing

ConferenceManager Emergency Conferencing uses Blast Dial to quickly connect first responders in an audio conference. In the event of an emergency, it is critically important to get a group of emergency responders together on a conference call as quickly as possible with minimal effort. When an emergency occurs the first responder dials an emergency number, this creates a conference and triggers a blast dial-out to other members of the response team. When each team member is called they are prompted to join the emergency conference in progress.

DISCOVER THE BENEFITS: ConferenceManager Emergency Conferencing is an added feature to the already rich set of conferencing functionality provided on the platform. ConferenceManager is an in-house audio conferencing bridge that eliminates the costly pay-as-you-go fees of subscription-based services, while setting new standards for ease of use and administration, flexibility, and control. ConferenceManager works with any existing voice or data network and is available with fully integrated Web conferencing.

EMERGENCY CONFERENCING:

- Automatic Blast Dial simultaneously to a list of emergency personnel
- Unlimited number of emergency groups
- Up to 3 phone numbers per person
- Phone number mapping to an emergency group, requiring no user input to initiate an emergency conference
- Blast Dial when first person dials in based on dialed number, no additional user input required

WEB CONTROLS:

- ConferenceManager Audio Console provides full conference control
- Activate Blast Dial to Invitee List or Address Book
- Up to ten sub-conferences off of the main audio conference
- Mute, Unmute, Disconnect, Hold, Add Additional Callers
- ActiveTalker™ Indication
- Viewable listing (by name or phone number) and count of all conference participants
